Setup Google Cloud Console and Editor
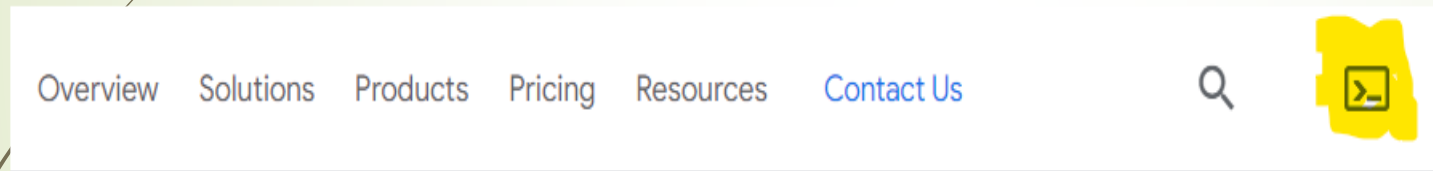

Access Google Cloud

- Open Google Chrome or any other browser and navigate to the below site

https://cloud.google.com/

- Sign in with your google id and password(In case you don't have one , please create a new account.

- Click on the icon "Activate Cloud Shell"

- Click on the Acknowledge link, it will open the cloud shell(In case if it prompts for an authorization , please accept)
Open Cloud Shell and Editor

- Press Ctrl key and click on Open Editor. This will open the editor in a new window

- Click on the icon "Open in a new window". This will open the cloud shell in a new window. Now you should have two tabs in the browser(one with Editor and other with Cloud shell)

- Now Switch back to the editor tab and click on the icon "Close Terminal". This will close the terminal window

- One of the tab should have Editor window and other should have the Cloud Terminal

Setup Docker and Kubernetes(Minikube)

- Navigate to the below link and setup Docker on the machine

https://www.docker.com/products/docker-desktop/

- Navigate to the below site and setup minikube

https://minikube.sigs.k8s.io/docs/start/
